EDUCATION

Raj Kumar Goel Institute Of Technology (AKTU)

Computer Science and Engineering with Data Science, Btech

Ghaziabad, U.P

2021 - 2025

pc senior secondary school (CBSE)

Intermediate in Science

Ghaziabad, U.P

2018 - 2020

pc senior secondary school (CBSE)

Matriculation

Ghaziabad, U.P

2017 - 2018

TECHNICAL SKILLS

Frontend Technologies: React.js, Redux Toolkit, Zustand, JavaScript (ES6+), HTML5, CSS3

Design Styling: Tailwind CSS, Sass, Bootstrap, Figma, Canva

Backend Technologies: Node.js, Express.js, REST APIs, API Integration

Databases Cloud: MongoDB, MySQL, Firebase, AWS (Beginner), Vercel, Netlify

Testing & QA: Jest, Supertest, Test-Driven Development (TDD)

Tools Others: GitHub, VS Code, Postman, Chrome DevTools

Prompt Engineering: Designing effective prompts for AI models, ChatGPT, OpenAI API integration

EXPERIENCE

Kira ID Solutions

Jun 2025 – Sep 2025

MERN Stack Developer Intern

Remote/Noida, India

- Contributed to the development of a scalable **B2B e-commerce platform** using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** along with **MySQL and SQL** for structured data modules.
- Implemented **user authentication, OTP verification**, and dynamic seller/buyer dashboards with role-based access control.
- Developed and integrated **RESTful APIs** and worked on **microservice architecture** for modular backend design.
- Applied concepts of **system design** to optimize database structure, improve scalability, and enhance data flow efficiency.
- Used **Redux Toolkit** for state management and **Tailwind CSS** for responsive and modern UI components.
- Leveraged **GitHub Copilot** and **Prompt Engineering** for faster development and AI-assisted coding workflows.

PROJECTS

ChatGPT Clone with Long-Term Short-Term Memory

- Built a ChatGPT-like conversational AI using Node.js, Express, and frontend integration. Implemented short-term memory for contextual replies within a single chat session.
- Added long-term memory to store user history, enabling personalized and continuous conversations.
- Added localStorage to persist user data across sessions
- Links:** [GitHub Repo](#) — [Live Demo](#)

Moody Player

- Built a mood-based music player using React, Express, MongoDB, and ImageKit.
- Integrated face detection to identify emotions and automatically play songs matching the user's mood.
- Links:** [GitHub Repo](#) —

ACHIEVEMENTS

- Participated in a **National Hackathon (2025)** and built a Prime Bottle-themed website using React.js and Tailwind CSS.
- Worked on **MERN stack projects** with microservice-based architecture.
- Applied **Prompt Engineering** and used **GitHub Copilot** for faster, cleaner development.
